

00 / THE WHOLE ECOSYSTEM

ALKANES.FUN

The next wave starts here.

Bringing native, on-chain launches to Bitcoin.

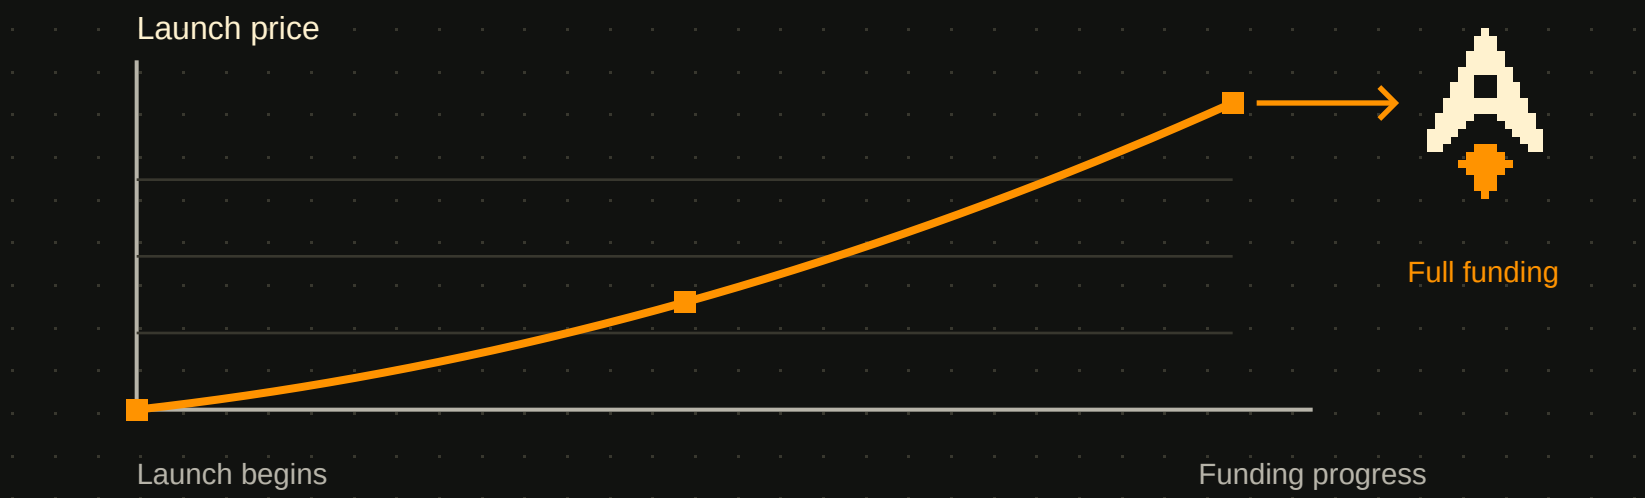

Projects bring activity. Activity generates revenue. Creators keep building; the platform keeps buying back its token.

MAKE ALKANES GREAT AGAIN.

01 / FROM IDEA TO MARKET

THE LAUNCH CURVE.

From participation to a market, along an on-chain curve.

Earlier participation. A lower curve entry price.

Each purchase moves funding forward. The launch price rises along the curve as funding progresses, giving each stage a clear pricing rule.

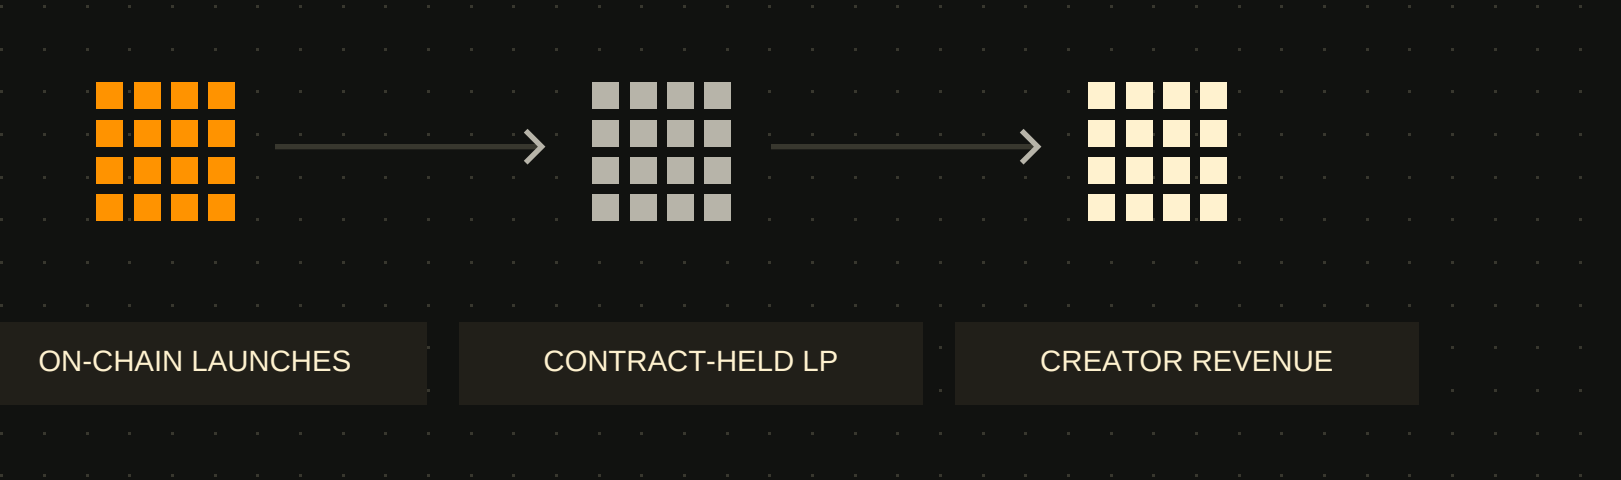

Once funding reaches its target, the project graduates automatically, establishes liquidity and opens for trading. The token participants received at launch continues with them into this next stage.

From the launch curve to pool trading, the project and its community keep growing on-chain.

02 / THE TRUST MODEL

TRUST, MADE VISIBLE.

Put the important commitments into on-chain rules.

Trust comes from mechanisms people can understand.

How launches progress, how projects graduate and who holds the liquidity are all governed on-chain. The important parts of the journey follow clear rules.

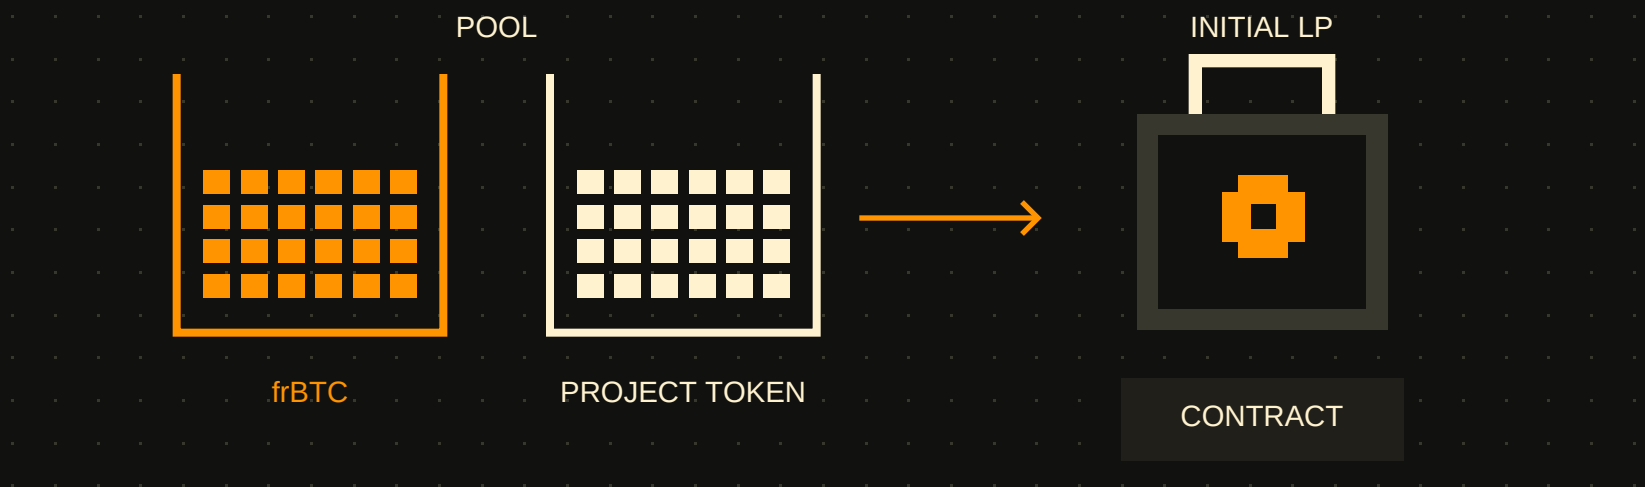

Initial LP is held by contracts, so neither creators nor the platform can withdraw that liquidity at will. Creators earn from project activity, while platform buybacks connect the wider ecosystem. Each role is clear.

This is the ALKANES.FUN trust model: contracts uphold the key commitments, creators focus on building, and communities can understand what they are joining.

03 / LIQUIDITY PROTECTION

LIQUIDITY STAYS.

Contract-held LP. Liquidity that stays with the project.

After graduation, the initial liquidity stays in the pool to support trading.

Graduation creates the project's trading pool, with its initial LP held by a contract. Neither the creator nor the platform can withdraw that initial liquidity at will.

This protection is part of the contract itself. It gives the community a clear foundation: the initial liquidity established at launch stays in place to serve the market.

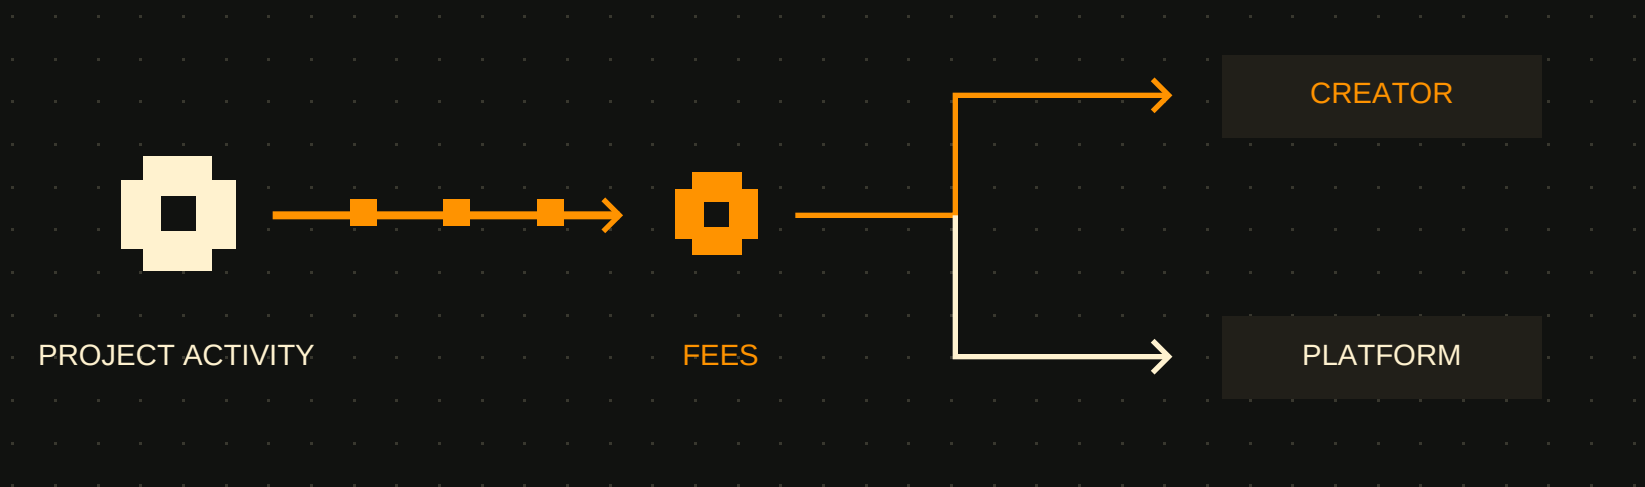

With that foundation, creators can focus on building and communities can look further ahead.

Contract-held LP. A stronger foundation for building.

04 / CREATOR ECONOMICS

KEEP BUILDING.

Keep the project active. Keep a reason to build.

The people who build a community should share in what its activity creates.

Creators earn revenue from their project's launch and subsequent trading. An active project gives its creator a reason to keep investing time, reaching new people and growing the community.

Building products, creating content, organizing events and bringing people together all take effort. This model connects that work with the activity of the project.

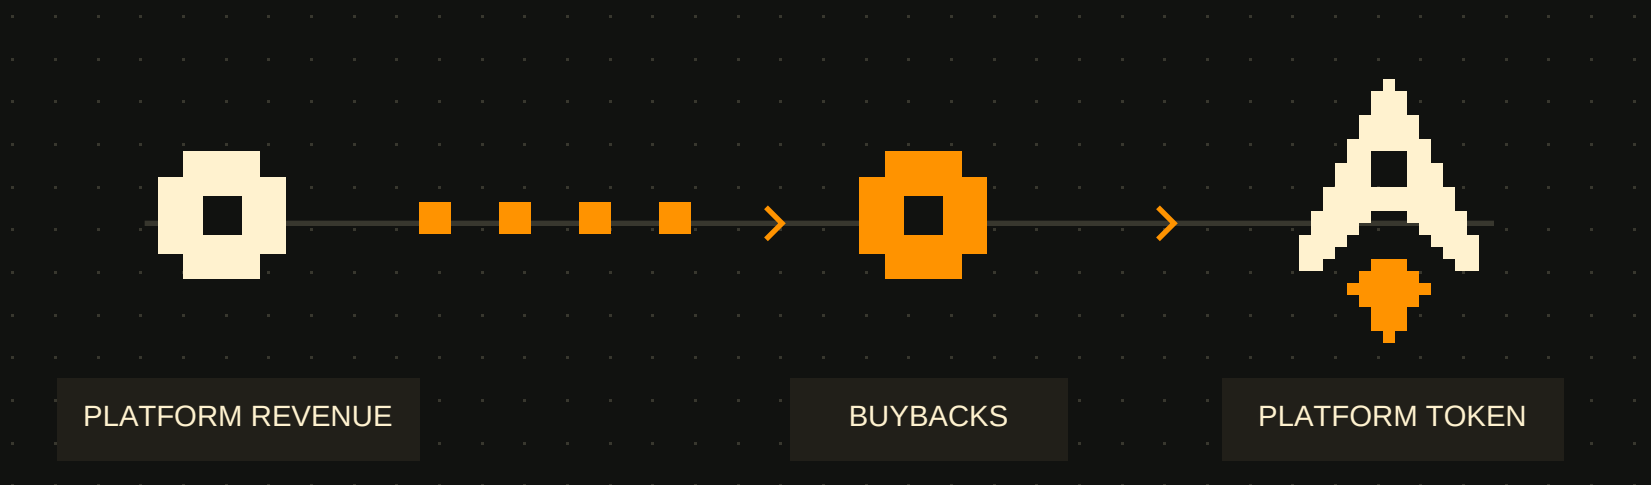

The story continues after launch. Creators keep building, communities keep participating, and the revenue projects generate helps sustain that work.

Give people who keep building a reason to keep going.

05 / THE PLATFORM TOKEN

CONNECTED TO ACTIVITY.

Connected to the life of the platform.

The platform token connects with the whole ALKANES.FUN ecosystem.

The platform uses its own revenue for ongoing buybacks of the platform token. Launches and trading generate platform revenue; buybacks connect that activity with the token.

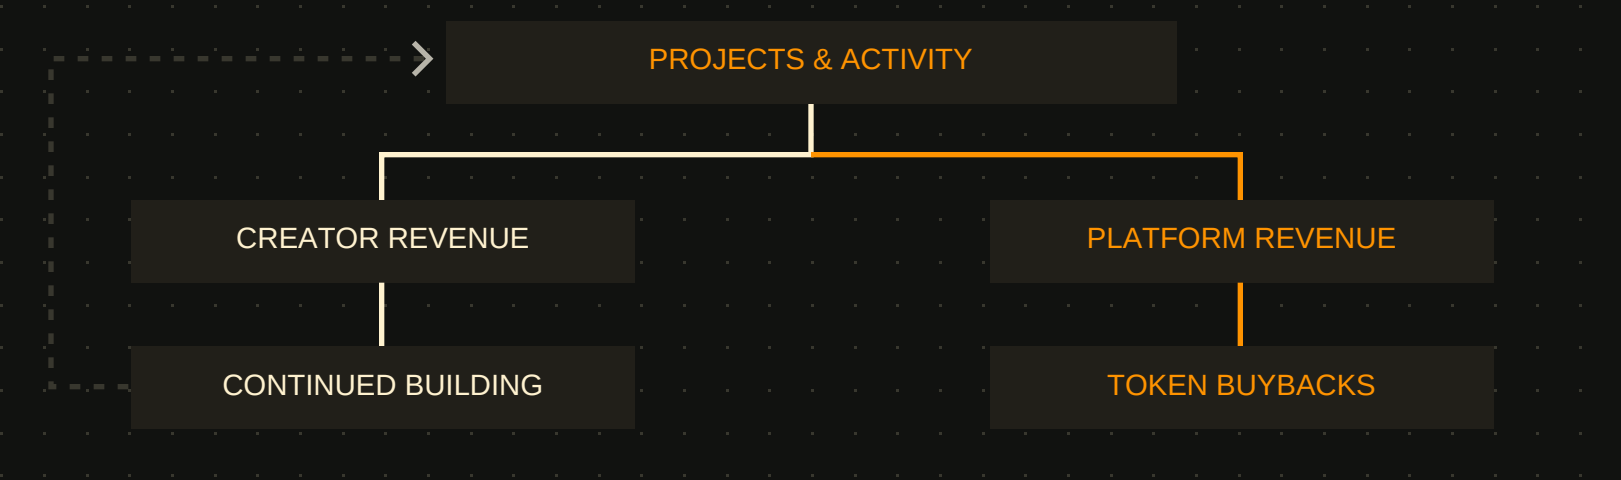

Every project has its own community. The platform token connects with the wider ecosystem those communities share, with token economics built around the platform's long-term development.

It also leaves room for future community participation in platform governance, connecting long-term participants with what comes next.

06 / THE ECONOMIC FLYWHEEL

ACTIVITY FEEDS BACK.

Put the energy of the ecosystem back to work.

More projects and more participation connect revenue with continued building.

Projects generate trading activity, and creators earn revenue. That gives creators a reason to keep improving their projects, growing their communities and inviting more people to participate.

The platform also earns revenue from this activity and uses it for ongoing token buybacks. The activity of individual projects becomes part of a shared platform economy.

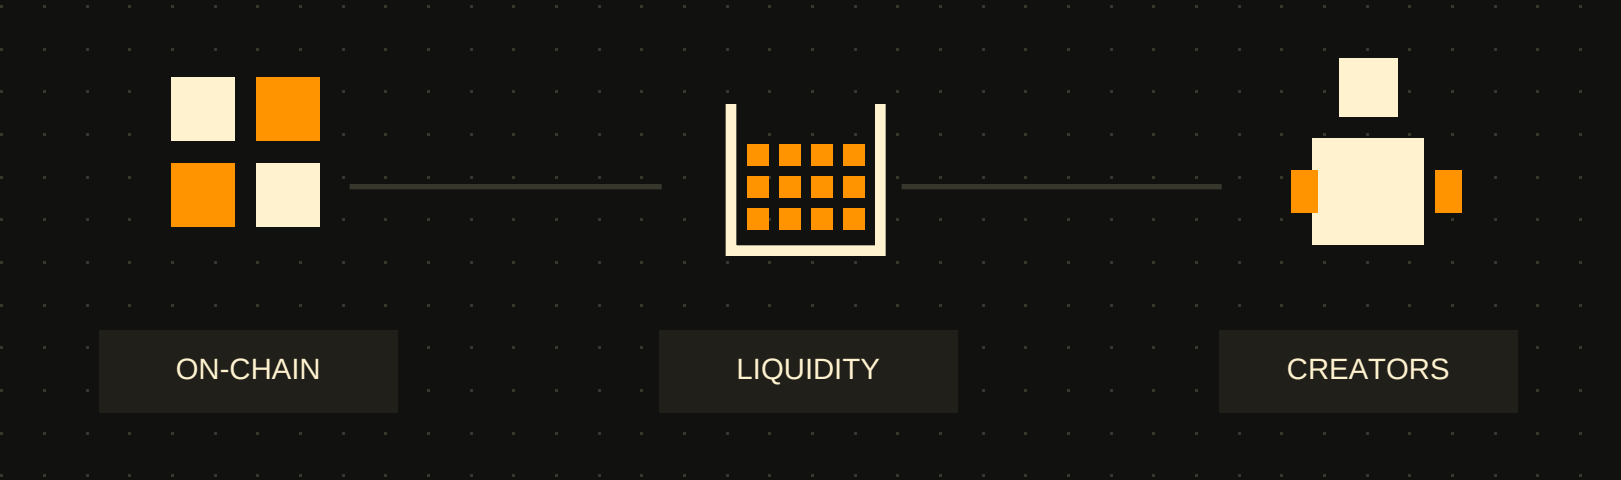

That is the flywheel: projects bring activity, activity generates revenue, and revenue supports continued building and buybacks. Creators, communities and the platform move toward a longer-term future together.

Projects bring activity. Activity supports building and buybacks.

07 / THE IDEA

BUILT ON BITCOIN.

A home for new ideas on Bitcoin.

An idea and a group of people who believe in it can be the beginning of a new community.

ALKANES.FUN lets anyone start a project, launch a token and bring their first supporters together on Bitcoin. It connects launching, trading and continued building, giving communities a foundation to grow.

Three ideas sit at its heart: launches happen on-chain, initial liquidity is held by contracts, and creators share in the revenue their projects generate. The platform also uses its own revenue for ongoing token buybacks.

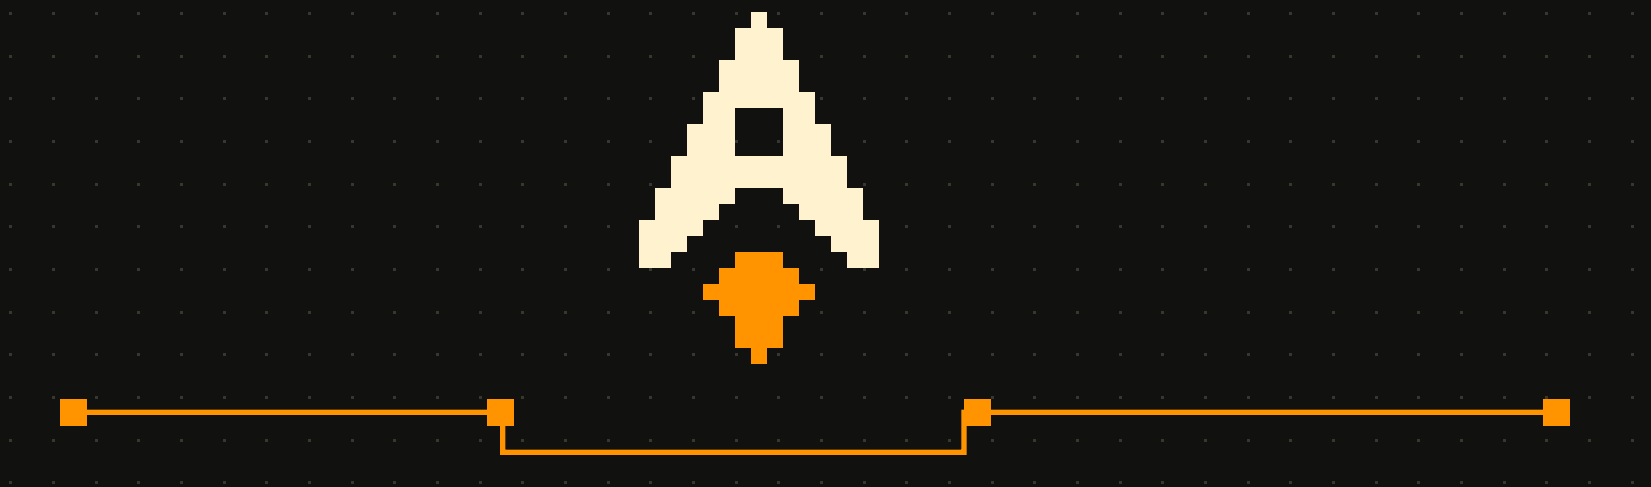

From the first steps of one project to the growth of the wider ecosystem, participation and building each have a place.

Give ideas a beginning. Give communities room to grow.

08 / BUILD THE NEXT WAVE

THE NEXT WAVE IS OURS.

The next wave is something we build together.

A new idea. People ready to act. A fresh beginning.

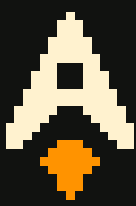

We are building a launchpad for people ready to start, incentives for people who keep building, and a clear foundation of trust for the communities that join them.

Here, ideas can become projects, participation can become community, and a project's growth can connect with its creator and the wider platform.

Bring more creators to Bitcoin. Give more communities a place to begin. The next wave starts here, at ALKANES.FUN.

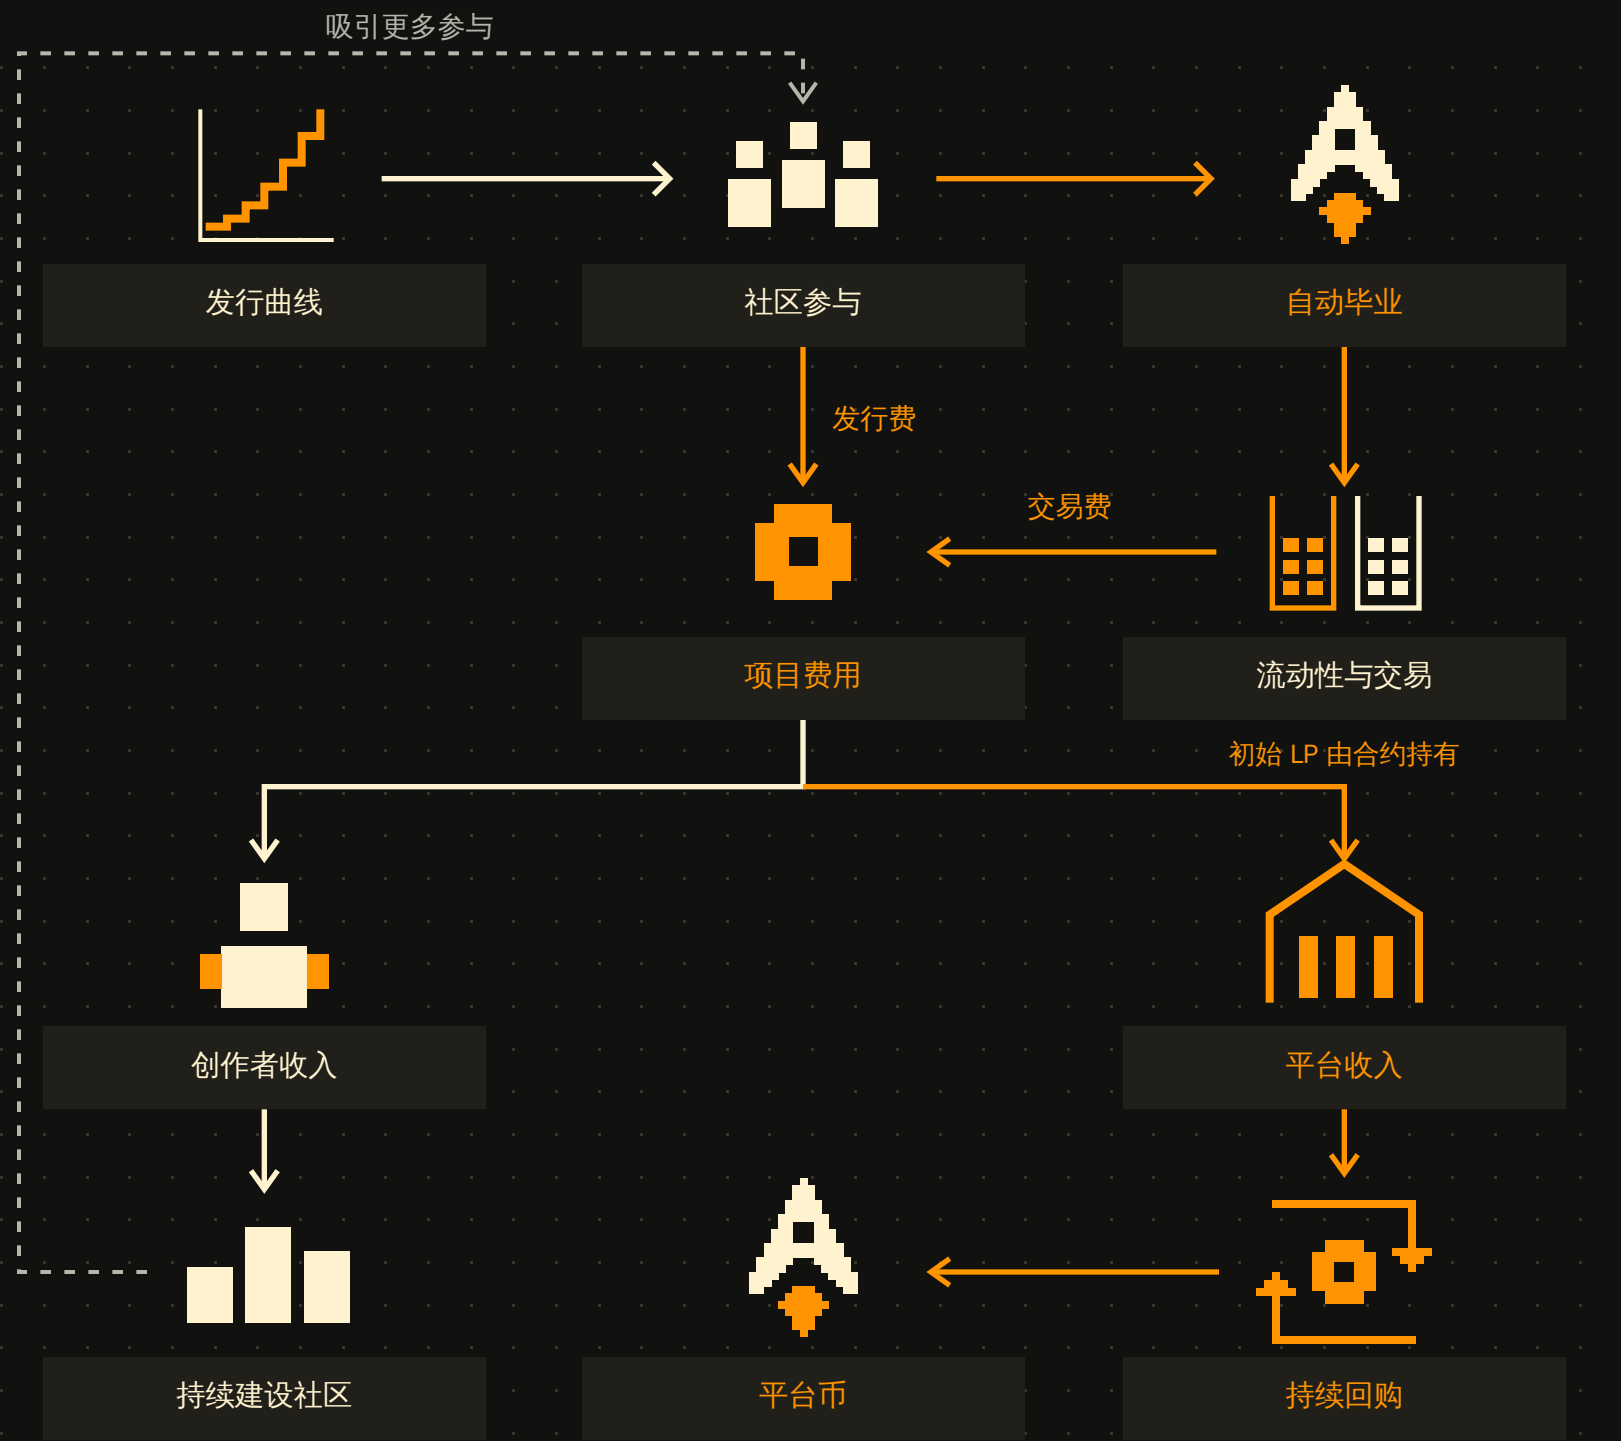

00 / 一张图，看懂整个生态

ALKANES.FUN

The next wave starts here.

让原生、纯链上的发行，来到 Bitcoin。

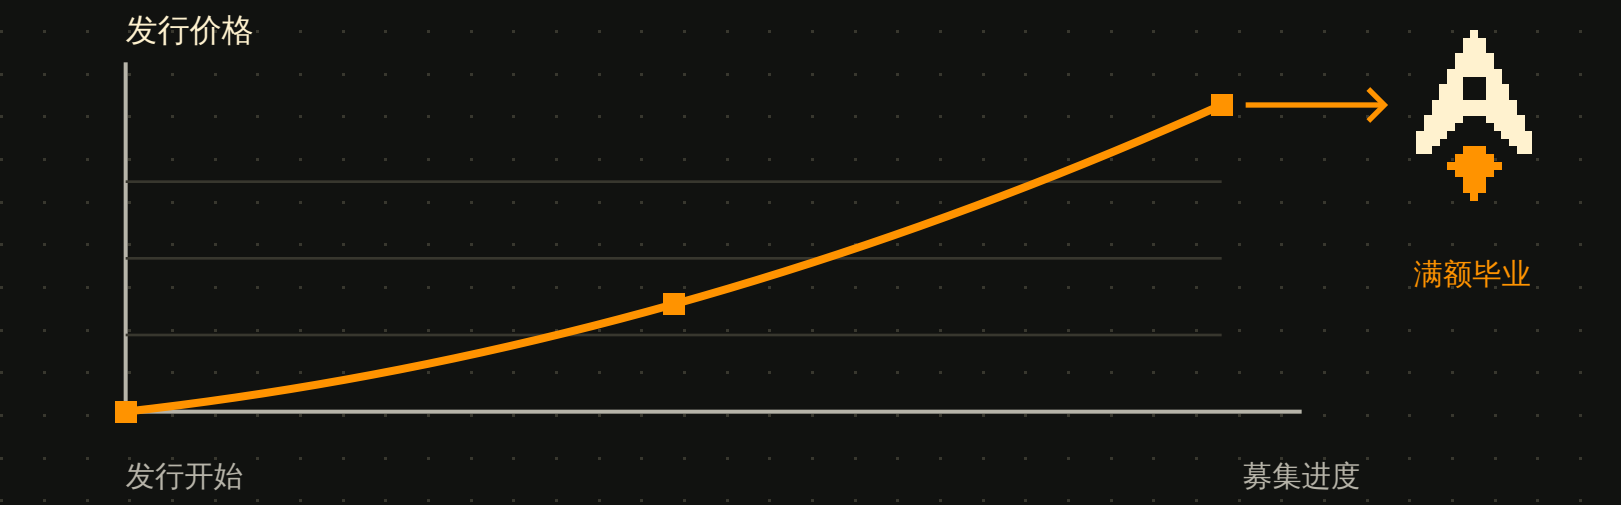

项目带来活动，活动产生收入。创作者持续建设社区，平台持续回购平台币。

MAKE ALKANES GREAT AGAIN.

01 / 从想法到市场

THE LAUNCH CURVE.

沿着链上曲线，从参与走向市场。

越早参与，曲线买入价格越低。

每次参与，都推动募集进度向前。发行价格随进度沿曲线上升，让不同阶段的参与有清楚的定价规则。

募集满额后，项目自动毕业，建立流动性并进入交易。发行时获得的代币，会继续陪伴参与者走进下一阶段。

从曲线发行到池内交易，项目与社区在同一条链上继续成长。

参与，集结，发射。

02 / 信任模型

TRUST, MADE VISIBLE.

把重要的承诺，交给链上规则。

信任来自看得见的机制。

发行如何进行、项目如何毕业、流动性由谁持有，这些关键环节都放在链上，按照明确的规则运转。

初始 LP 由合约持有，创作者和平台无法随意撤池。创作者获得项目带来的收入，平台通过持续回购连接整个生态。每一方的角色，都能被清楚理解。

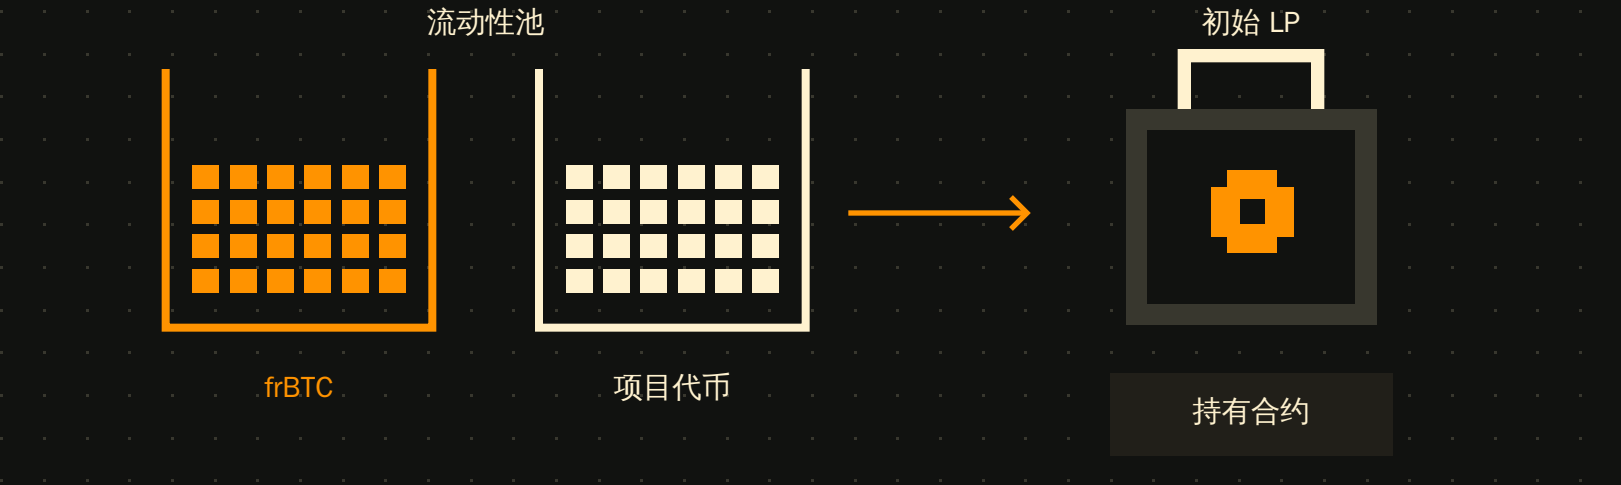

这就是 ALKANES.FUN 的信任模型：让合约守住关键承诺，让创作者专注建设，让社区看清自己正在参与什么。

链上规则，清楚的角色，长久的建设。

03 / 流动性保护

LIQUIDITY STAYS.

LP 由合约持有，流动性为项目留下。

项目发射之后，支持交易的初始流动性会留在池中。

项目毕业时建立交易池，初始 LP 由合约持有。创作者和平台都无法随意撤走这部分流动性。

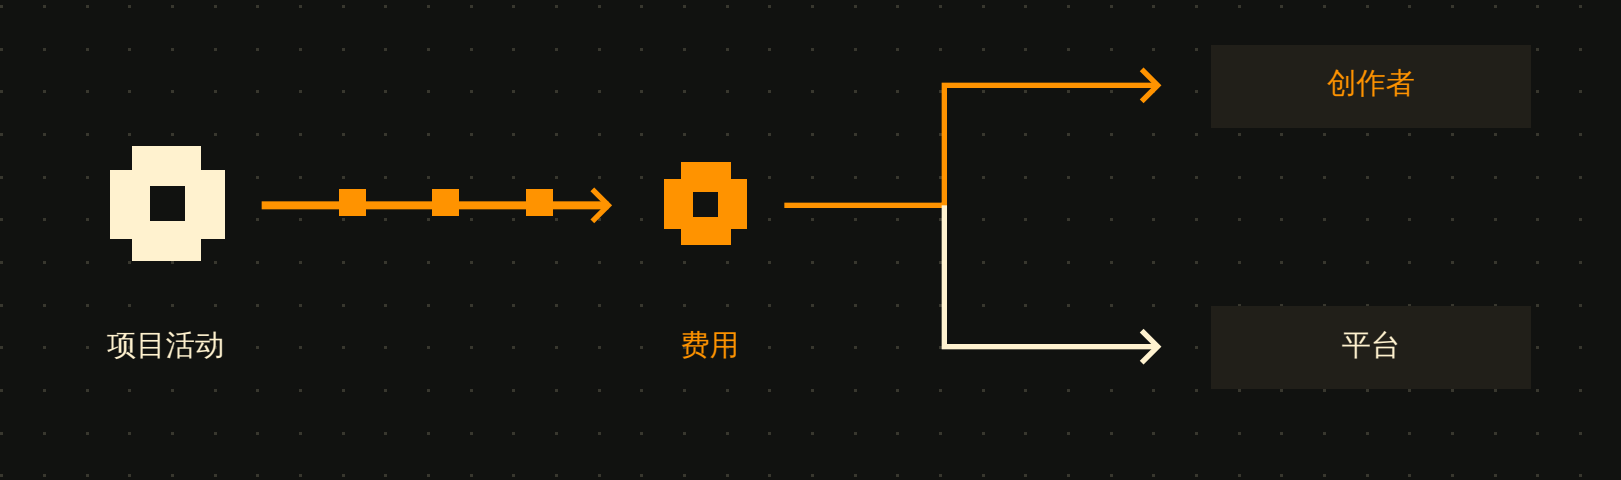

这份保护来自合约本身。它让社区看清一个关键事实：项目建立起来的初始流动性，会继续服务于市场交易。

有了这层基础，创作者可以把精力放在建设上，社区可以把目光放得更长远。

合约持有 LP，让建设有更稳固的起点。

KEEP BUILDING.

项目持续活跃，建设持续获得回报。

把社区做起来的人，也应该分享社区成长带来的成果。

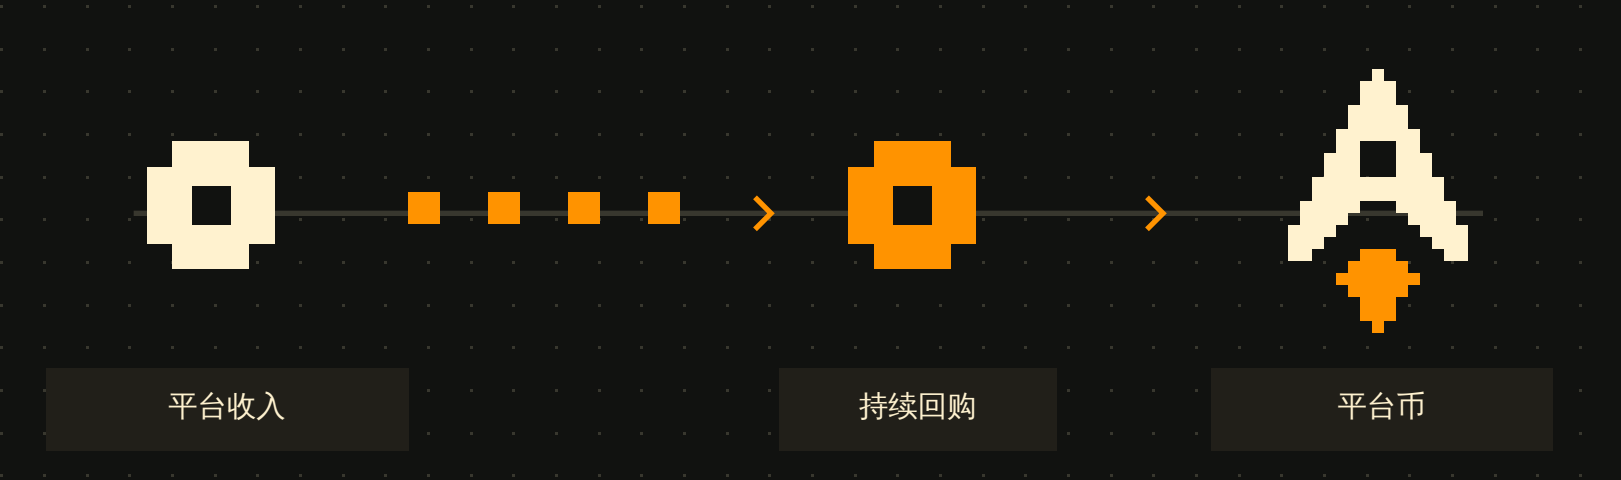

创作者可以从项目的发行和后续交易中获得收入。项目越活跃，创作者就越有动力持续投入，让更多人看见项目、参与社区。

无论是做产品、做内容，还是组织活动、拓展社区，长期经营都需要时间和精力。这套机制让创作者的付出，与项目的活力连接起来。

发行之后，故事继续。创作者持续建设，社区持续参与，项目产生的收入也持续为建设提供动力。

CONNECTED TO ACTIVITY.

平台越有活力，平台币的联系越紧密。

平台币连接的是 ALKANES.FUN 的整个生态。

平台会用自身收入持续回购平台币。项目的发行与交易为平台带来收入，回购则把这些活动与平台币连接起来。

每一个项目都有自己的社区，平台币把这些社区所在的共同生态串联起来。它的代币经济学，围绕平台的长期发展展开。

平台币也为社区未来参与平台治理保留空间，让长期参与者与平台一起面向未来。

ACTIVITY FEEDS BACK.

让每一份活力，都推动生态向前。

更多项目，更多参与，让收入与建设不断连接起来。

项目产生交易，创作者获得收入。有了持续经营的动力，创作者可以投入更多精力做好项目、发展社区，吸引更多人参与。

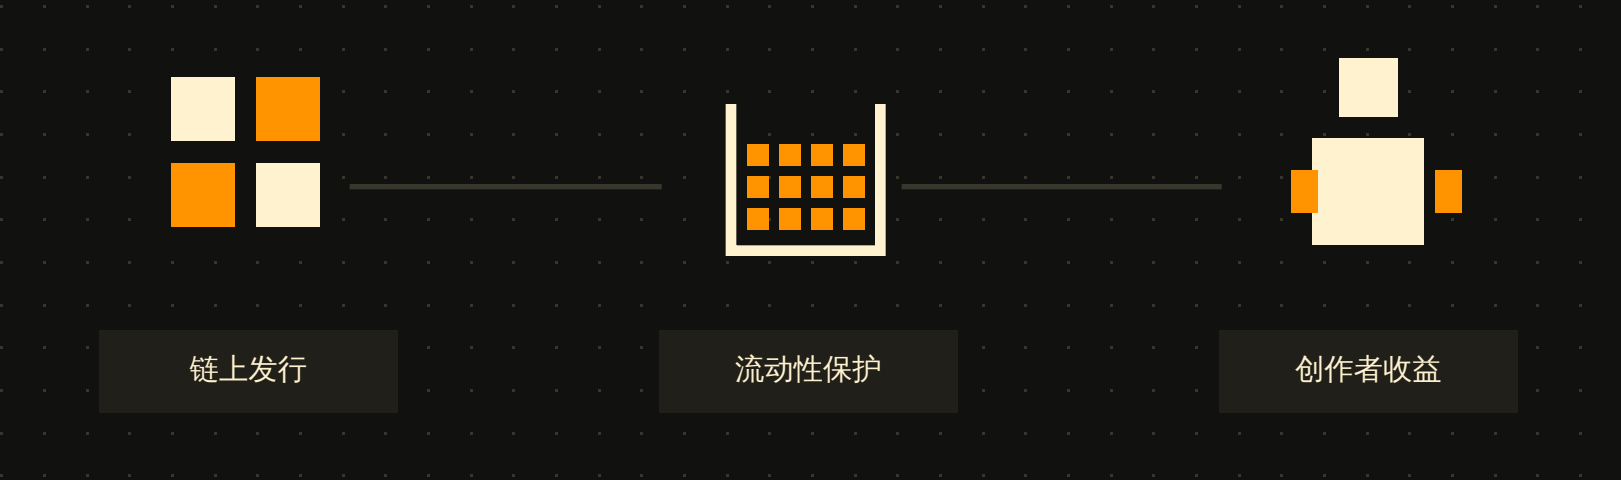

与此同时，平台从这些活动中获得收入，并持续回购平台币。一个个项目的活力，由此汇聚成平台共同的经济联系。

这就是我们的飞轮：项目带来活动，活动产生收入，收入支持持续建设与回购，让创作者、社区和平台朝着长期发展的方向前进。

07 / 我们的出发点

BUILT ON BITCOIN.

让好想法在 Bitcoin 上生长。

一个想法，一群相信它的人，就是一个新社区的起点。

ALKANES.FUN 让每个人都能在 Bitcoin 上发起项目、发行代币，与第一批支持者一起走向市场。我们把发行、交易和长期建设连接起来，让社区拥有向前发展的基础。

这套基础由三个部分组成：发行在链上进行，初始流动性由合约持有，创作者分享项目带来的收入。平台也会用自身收入持续回购平台币。

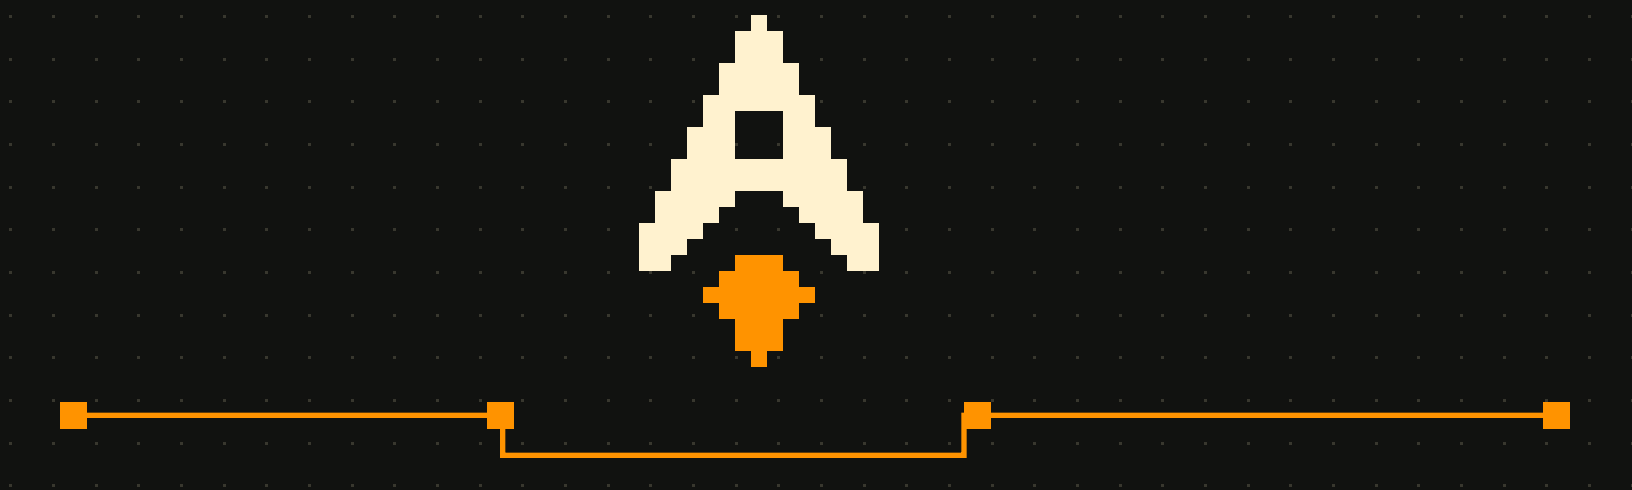

从一个项目的起步，到整个生态的成长，我们希望每一份参与和建设，都能找到自己的位置。

让想法出发，让社区生长。

08 / 一起出发

THE NEXT WAVE IS OURS.

下一波浪潮，由我们一起创造。

一个新想法，一群行动的人，一次新的开始。

我们为敢于发起的人搭建发射台，为持续做事的人创造动力，也为愿意参与的社区建立清晰的信任基础。

在这里，想法可以成为项目，参与可以汇聚成社区，项目的成长可以与创作者和整个平台连接起来。

让更多创作者来到 Bitcoin，让更多社区从这里出发。下一波浪潮，从 ALKANES.FUN 开始。
